

TOTAL PLANT MANAGEMENT: For better productivity and profits.

Our Total Plant Management program includes four primary components including state-of-the-art rail systems for both soil and clean goods transfer, information systems, such as PPS, which measures, monitors and manages people to reduce labor cost, Catalyst systems for unparalleled chemical delivery, and sortation systems to automatically and accurately sort garments with minimal labor. To learn more, visit www.softrol.com. Or, call us today at 1-888-SOFTROL.

Manage productivity for improved efficiencies

Efficient and labor-reducing rail systems

Accurate wash aisle chemical delivery

Sortation systems that minimize labor
