

WE DIDN'T EXCEED EXPECTATIONS... WE SHATTERED THEM.

The SCADA SL™ delivers the ultimate control and data interface to the side loading washer extractor. It's not your conventional washing machine control. SCADA SL™ is the first, ever available control interface platform that includes complete manual, schematics, proactive alarming maintenance schedule, 1-2-3 and 4 level troubleshooting diagnostics, visual training, 24/7 remote access availability, rapid lockout algorithms, customer reports and much, much more. Advanced program engineering delivers a user-friendly interface platform that is not only simple to operate but saves time, maintains consistent training methodology and avoids costly downtime errors.
