

High capacity
with optimized
CO₂-footprint and
less noise

Good solutions are well thought out: The new JENSEN Katana

The new "Katana" folder crossfolder is the compact solution with four JENSEN inline stackers. A maximum of six stackers can be configured to meet the customer's needs.

Each crossfold section is reverse belt folding, with a knife (the Japanese call it "Katana") in order to achieve optimum control and the best possible folding result. Our multi-blade technology replaces air blast, reducing compressed air consumption by up to half and reducing operating noise.
